AABB Perioperative Autologous Blood Accreditation Consulting

Last reviewed October 2026 · https://www.integralhs.com/aabb-perioperative-autologous-blood-accreditation

What to have ready

Each item ties to the AABB Perioperative Standards (11th edition, effective January 1, 2025; 12th edition, effective January 1, 2027) [https://www.aabb.org/standards-accreditation/standards/standards-for-perioperative-autologous-blood-collection-and-administration], the Accreditation Activities list (Version 3) [https://www.aabb.org/docs/default-source/default-document-library/accreditation/aabb-accreditation-activities.pdf] or the AABB Accreditation Process [https://www.aabb.org/standards-accreditation/accreditation/become-accredited/accreditation-process].

1. AABB's written answer on which edition your assessment will use, and a copy of each edition.
2. A list of the perioperative services you perform, set against the activity definition: acute normovolemic hemodilution, intraoperative and postoperative blood recovery, and perioperative component production.
3. The locations or operational areas where those services take place, since the activity definition is tied to where in the facility the work happens.
4. Your agreements with any contract personnel who perform the work, since the activity definition reaches contract personnel as well as facility staff.
5. A roster of the professionals who deliver the service, by role: anesthesiologists, perfusionists, surgeons, transfusionists and others named in the standards' scope.
6. Your collection, storage and administration procedures, which the standards' scope names.
7. Equipment records for the devices used in collection and recovery.
8. Dated records showing at least six months of operation in the Perioperative Activity.
9. Completed records showing staff work from the PPPs.
