ACS Children's Surgery Verification Consulting

Last reviewed October 2026 · https://www.integralhs.com/acs-childrens-surgery-verification

What to have ready

Each item below ties to Optimal Resources for Children's Surgical Care, 2021, or to the ACS CSV pages, opened October 3, 2026.

- Your copy of Optimal Resources for Children's Surgical Care, 2021, the version ACS applies to site visits after July 1, 2022 (ACS press release, 2021 [https://www.facs.org/media-center/press-releases/2021/new-csv-program-071321/]).
- A target level, chosen from the three levels in the standards (ACS, CSV Standards [https://www.facs.org/quality-programs/accreditation-and-verification/childrens-surgery-verification/standards/]).
- A list of the 104 standards marked for the level you seek, each with an evidence owner (same page).
- Staffing and service capability data that show your current scope of practice, since the three levels are tied to scope of practice (ACS, CSV Standards [https://www.facs.org/quality-programs/accreditation-and-verification/childrens-surgery-verification/standards/]).
- Your status in ACS NSQIP Pediatric, the ACS program the CSV page mentions for clinical data and outcome comparison (ACS, Children's Surgery Verification [https://www.facs.org/quality-programs/accreditation-and-verification/childrens-surgery-verification/]).
- Access to QPort for the online application.
