ASGE Endoscopy Unit Recognition Program (EURP) Consulting

Last reviewed October 2026 · https://www.integralhs.com/asge-endoscopy-unit-recognition-readiness

What to have ready

Each item below ties to the EURP application, which carries an effective date of January 1, 2026, or to ASGE's EURP pages, opened October 3, 2026.

- Evidence that the unit holds current accreditation, with the accrediting body's name and expiration date, because the application asks for both (ASGE EURP application [https://www.asge.org/docs/default-source/practice-support/eurp/eurp-application_2025_fillable-form.pdf?sfvrsn=3d9c455f_7], page opened October 3, 2026).
- A count of unit endoscopists who hold ASGE membership, since the application requires at least half of them to be members before the unit applies, and counts any physician who performs endoscopic procedures in the unit as an endoscopist (ASGE EURP application [https://www.asge.org/docs/default-source/practice-support/eurp/eurp-application_2025_fillable-form.pdf?sfvrsn=3d9c455f_7], page opened October 3, 2026).
- Your colorectal cancer screening share of colonoscopy volume, which ASGE uses to define the pathways (ASGE, EURP application journey [https://www.asge.org/home/practice-support/recognition-programs/eurp/application-journey]). The text gives the ASC/HOPD/Office pathway for settings at 5% or more and the Hospital pathway for hospital-based units at 5% or less, so a hospital-based unit at exactly 5% fits both; ask ASGE which applies. IHS drafts the question; your unit sends it.
- Unit policies that adopt each ASGE guideline and the CDC infection control guideline named in the application, ready for the medical director's attestation (ASGE EURP application [https://www.asge.org/docs/default-source/practice-support/eurp/eurp-application_2025_fillable-form.pdf?sfvrsn=3d9c455f_7]).
- A written description, for the prior year, of how the unit trains staff and checks their competency in endoscope reprocessing, sterile medication administration and infection prevention, with the medical director's attestation (ASGE EURP application [https://www.asge.org/docs/default-source/practice-support/eurp/eurp-application_2025_fillable-form.pdf?sfvrsn=3d9c455f_7], page opened October 3, 2026).
- Training and competency records that support the infection control attestation (ASGE, EURP application journey [https://www.asge.org/home/practice-support/recognition-programs/eurp/application-journey], page opened October 3, 2026).
- Proof that at least one unit representative has completed the ASGE Quality Course. First-time applicants take the Improving Quality and Safety in Your Endoscopy Unit course, and renewing units may take it or the GI Unit Leadership course instead (ASGE, How to apply [https://www.asge.org/home/practice-support/recognition-programs/eurp/application-journey/applications-fees/how-to-apply-to-eurp], page opened October 3, 2026).
- For the Quality Policy Assessment, the unit's own policies for assessing colonoscopy quality measures, with performance results at unit and endoscopist level (ASGE EURP application [https://www.asge.org/docs/default-source/practice-support/eurp/eurp-application_2025_fillable-form.pdf?sfvrsn=3d9c455f_7], page opened October 3, 2026).
- The sequence in ASGE's materials: the application fee is processed after ASGE confirms the membership threshold is met, and the unit then has one year from payment to meet every requirement (ASGE EURP application [https://www.asge.org/docs/default-source/practice-support/eurp/eurp-application_2025_fillable-form.pdf?sfvrsn=3d9c455f_7], page opened October 3, 2026). ASGE's how-to-apply page adds that all requirements must be met before the application is submitted (ASGE, How to apply [https://www.asge.org/home/practice-support/recognition-programs/eurp/application-journey/applications-fees/how-to-apply-to-eurp], page opened October 3, 2026). The two statements sit side by side without further explanation on the pages we reviewed, so ask ASGE

how they apply to your unit. Plan the membership threshold first, the fee second, and everything else inside the year.
