

Rural Health Transformation Program Implementation for Rural Providers and Networks

Last reviewed October 2026 · <https://www.integralhs.com/rural-health-transformation-program-network-build>

What to have ready

This is IHS's planning list, built from the two government pages named above and not from any state's requirements.

- Your state's Rural Health Transformation Plan and the name of the state agency that administers it.
- Any state document that describes how funds reach providers, since each state sets its own rules.
- The approved uses of funds on the Medicaid.gov page (Medicaid.gov [<https://www.medicaid.gov/resources-for-states/rural-health>]), marked with the three or more your state chose.
- A list of the facilities and services in your hub-and-spoke model or network, and the role each one plays.
- Existing governance documents, such as bylaws, board and committee charters and conflict of interest policies.
- Existing quality program documents and measures.
- Current data-sharing agreements and your cybersecurity and information technology documentation.
- Existing compliance program materials and your compliance officer's name.
- Your counsel's decision on the network's legal structure.
- The name of the person at your organization who will submit materials to your state.
