

State AI Utilization Review and Human Review Compliance (Iowa and Colorado)

Last reviewed October 2026 · <https://www.integralhs.com/state-ai-utilization-review-human-review-compliance>

What to have ready

This is IHS's planning list, built from the two texts above, not a regulator's checklist.

- A list of every AI tool used in your utilization review process, with the vendor contract for each.
- A process map showing where each tool is used in intake, prior authorization, medical necessity review and appeal (Colorado subsection 4).
- Your utilization management policies on prior authorization, expedited review, medical necessity and denials.
- Any written rule on who approves an adverse determination and whether a human must.
- Your reviewer roster with licenses and areas of clinical competence (Colorado subsection 5(b)).
- The logs and model-governance records each tool produces, and where they are kept (Colorado subsection 3).
- Any periodic review of each tool's performance and use, and a statement of the purpose for which it uses health data (Colorado subsection 3).
- Your counsel's written view on which provisions of HF 2635 and HB26-1139 reach your organization and from what date.
- The name of the person who would file any disclosure.
